

ABATTOIR
SUPPLY CO

COMPANY PROFILE 2023

We get it.

**WE PROVIDE ABATTOIR DESIGN
AND DEVELOPMENT SERVICES
FOR SMALL TO LARGE SCALE
PROJECTS.**

PROFESSIONAL

We value professionalism, approachability and promptness, while priding ourselves on our exceptional service and ease of doing business.

EXPERIENCED

Our team consists of skilled, qualified experts and artisans with years of experience within their field, ensuring quality control and high standards of work.

COMPETITIVE

Strong partnerships with industry leading suppliers and experts, enable us to offer superior products and services at competitive prices.

A B O U T U S

Complete abattoir systems and supply specialists.

Our service is fully comprehensive, and offers great value for money. Our client centric approach takes into all unique requirements into consideration, while providing the most optimised solution in terms of work flows, efficiencies, and compliances.

Our process design extends from the animal entering the facility, right until the product is dispatched for retail.

As a specialist for customised, complete abattoir system solutions, including the processing of by-products, cutting systems, logistics and refrigeration, we have made a name for ourselves in sub-saharan Africa. Our customers particularly value our first-class solutions, combined with vast experience in regional markets.

APPROACH

Highly focused on customer service.

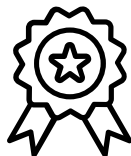

We embrace the philosophy that our customers are the most important people in our business.

In this regard, every effort is made to give clients the best products and service at competitive rates. We are committed to ensuring that our clients receive reliable and personal service that exceeds expectations.

We are committed to expand to meet the growing needs of our customers. It is for this reason that the sale does not stop at the final installation, but becomes the beginning of a long association whereby the equipment is serviced and monitored to ensure maximum life.

We have the ability to set and maintain the desired quality standards expected by all our customers, thus we are committed to change in accordance with their needs and expectations.

TRUSTED

Committed to quality.

We are a dynamic organisation with endless drive and commitment to be the best in all areas of our operations.

We are dedicated to providing quality and affordable products and services that are highly optimal and cost effective.

“

WE ARE DEDICATED TO PROVIDING QUALITY AND AFFORDABLE PRODUCTS THAT ARE BEST SUITED TO OUR CLIENTS.

INNOVATIVE

Comprehensive offering.

Our service is fully comprehensive, and offers great value for money. Our client centric approach takes all unique requirements into consideration, while providing the most optimised solution in terms of work flows, efficiencies, and compliances. Our process design extends from the animal entering the facility, right until the product is dispatched for retail.

- Single or combined lines for all types of livestock.
- Highly effective cutting systems.
- Optimal exploitation of by-products.
- Tubular track technology for optimised meat transportation.
- Custom-made systems that meet regulation standards.

“

WE ALSO SUPPLY A WIDE RANGE OF EQUIPMENT AND CONSUMABLES TO THE ABATTOIR INDUSTRY.

T U R N K E Y

Complete turnkey solutions.

Our turnkey solutions cover all aspects of the abattoir and livestock slaughtering industry, and our know-how ensures impressive quality. Our turnkey solutions cover all aspects of the abattoir and livestock slaughtering industry, and our know-how ensures impressive quality.

PROCESS DESIGN

Custom design and formulation of optimal operational processes and production lines.

ARCHITECTURAL

We provide Architectural Design and manage the municipal plans submission procedure.

ENGINEERING

Professional engineering services, including Civil, Structural, Electrical and Mechanical.

HVAC SYSTEMS

Design and installation for all Refrigeration and Mechanical Ventilation systems.

COMPLIANCE

Provision of Environmental Impact Assessments, and Water Use Licensing.

Slaughtering

Optimal dimensioning of systems for a smooth production performance.

Especially in an abattoir, safety, ergonomics, efficiency and of course hygiene all play a decisive role. Innovative and proven technology from Abattoir Supply Co ensures all of the working procedures in every slaughter-line and significantly improves efficiency. All of our abattoir solutions are precisely adapted to meet our customer needs and the requirements of the respective market.

Track Systems

Manual, semi-automatic or fully-automatic loading and unloading of cold-storage rooms.

Carcasses can be transported without delay and with minimum effort into the refrigerated rooms, a carefully conceived tubular track concept is required. For this, we plan and build track systems to your requirements to transport cut-up carcasses manually, semi-automatically or fully automatically to and from refrigerated storage rooms, which feature state-of-the-art technology.

- Solid construction using hot-dipped galvanised steel.
- Enhances cost-effective use of the refrigerated areas.
- Manual or fully automatic conveyor systems.
- Hook return systems.

Cutting Systems

Precise, professional and hygienic cutting systems.

We offer our customers complete lines which allow for precise, technically correct and hygienic cutting systems of the carcass in suitable portions for consumers and in primal cuts. The customers themselves determine the degree of automation in each case. Our specialists ensure smooth operation of all steps in the process, including a well considered hygiene and logistics concept, to produce products which are always fresh and have maximum storage life.

- ➔ Rotary blade saws, bandsaws, breaking saws.
- ➔ De-rinding and de-hiding machines.
- ➔ Manual or fully automatic conveyor systems.
- ➔ Hand knives and various tools.

Slaughtering process by-products.

Environmentally neutral disposal facilities for by-products.

When slaughtering animals, there are valuable by-products which can make a significant contribution to the value created in the operation. The more precise and hygienic, the more effective the result. So that this result can flow into the overall profitability calculations, all of the processing lines for the by-products – such as blood mixers, blood tanks and intestine cleaning lines, as well as environmentally neutral disposal systems for slaughter waste products are taken into account during planning.

PROCESS

How we work.

Our process is built on a foundation of collaboration, integration and consolidation. From development and production through fulfillment, we put the power of our expertise to work.

We focus on your deliverables from start to finish and examine the process from all perspectives, delivering the greatest efficiencies for even the most complex programs. By leveraging our decades of retail-specific experiences, we replace the traditional “silo” approach with a proven process that benefits all participants.

We’re known for our specialised skill-sets. Both our internal and on-site resources are the best in the industry and use our knowledge to assess your specific needs, and deliver innovative solutions.

EVERYTHING WE DO STEMS FROM A DISCIPLINED APPROACH. WE LISTEN, PLAN, STRUCTURE, THINK THROUGH, AND ONLY THEN DO WE ACTION.

DELIVERY AND INSTALLATION

We provide delivery and installation, using our nationwide staff compliment of skilled installers and technicians, we have the skills and resources to deliver — on time, every time, and anywhere.

TIMELINE

We work stringently within the specified and agreed timelines and schedules agreed to between ourselves and our clients, and we have a proven track record in delivering projects to full satisfaction.

WARRANTY

All completed projects are supported and managed by our head office operation, providing a single point of contact for resolving any post-installation issues. All projects will include a comprehensive 12 months warranty that covers materials, components and service.

INSIGHTS

Key operational aspects.

PLANNING

We start with the client, developing a step-by-step promotional plan, considering even the most frequently overlooked details. Our goal is to deliver solutions that minimise costs from Start to finish, with our guarantee that deadlines will be met 100%.

CLIENT ALIGN

Client collaboration is a crucial element for us. Throughout all phases, from ideation to implementation, we align our people, process and technology with your needs. This keeps all stakeholders focused on a common objective, with clear definitions of roles and responsibilities.

DESIGN

We are able to turn around preliminary visuals within 24-48 hours. We work with industry standard software (AutoCAD and Pro-Engineer) providing a complete breakdown and B.O.M with our designs.

Key benefits.

Complete turnkey solution that covers all project aspects.

Unparalleled expertise and experience in all areas.

Reliable and trusted maintenance and support.

Stringent quality control and high standards of work.

superior products and services at competitive rates.

CUSTOMER SERVICE IS ALWAYS A TOP PRIORITY FOR US. WE GIVE CUSTOMERS PEACE OF MIND THROUGH A TRANSPARENT AND ENRICHED CUSTOMER EXPERIENCE.

R E A C H

Local and International expertise.

We provide our services both locally and internationally, and we have successfully completed projects in multiple regions.

Our team has the experience, knowledge and capability to accurately cost and schedule projects in any location, and to facilitate the logistical challenges involved.

Through our extensive supplier and service network, we are able to provide ongoing support and maintenance services to clients based anywhere in the world.

All projects are supported and managed by our head office operation, providing a single point of contact for all Projects.
